

ELEC3609/9609 - Week 11

Lab

Project Help & Review Session

There is **no in-person project demonstration** in this lab. The session is reserved for teams to review their Assignment 2 work and ask tutors for help before submission.

Use the lab time to:

- clarify the Assignment 2 requirements and submission process;
- ask questions about implementation, testing, documentation, or the recorded demonstration video;
- troubleshoot remaining technical issues with guidance from a tutor;
- review whether your report and video provide sufficient evidence for the features you implemented; and
- prepare for the Week 12 technical interview.

! INFO

Bring your current source code, report draft, and a list of specific questions. Tutors can provide guidance and feedback, but the session is not an assessed presentation and tutors will not complete or pre-mark the assignment for you.

For the deliverables and submission deadline, refer to the [Assignment 2 requirements](#).
